Joint Program Management Office for the Light Armored Vehicle (LAV)

Who We Are

We manage the development, acquisition, testing, systems integration, product improvement and fielding of the Light Armored Vehicle (LAV) system, designed to enhance strategic mobility and provide mobile and survivable transportation and direct fire support. Our task is to provide a world class light armored vehicle to the force capable of closing with and destroying enemy forces and permitting the LAV crewman to accomplish his mission.

What We Do

- Our vision is to achieve world class leadership in innovative systems acquisition and effective sustainment of Light Armored Vehicles.
- Our Mission is to field technologically superior weapon systems while providing focused life cycle management to our customers.
- Our Strategic Goals are:
 - Exceed Customer Satisfaction
 - Foster Individual Growth
 - Promote the LAV Team
 - Expand the LAV Business Base
 - Optimize Resources
 - Practice Effective Personnel
 - Direction and Performance
 - Assessment

In doing this we will:

- Serve as stewards of national resources to meet operational needs of the mechanized U.S. Marine crewman.
- Employ assigned resources (time, personnel, space, information systems and budget) in the most efficient manner to accomplish assigned tasks.
- Implement DoD guidance for acquisition reform and streamlining.
- Optimize development, acquisition and logistics business processes.
- Foster the infrastructure necessary to provide ready, responsive, reliable and cost effective materiel development services to meet higher command and user community needs while exceeding their support expectations.
- Employ modeling and simulation where possible to conserve resources.
- Recruit, develop, train and retain a world class workforce that is fully competent, resourceful, diverse, values based, empowered and intolerant of discrimination.
- Have fun in what we do and pride in the services we provide.
