Waterervliet Arsenal

Who We Are

We are America's "Cannon Factory." The oldest, continuously active arsenal in America providing materiel for the warfighter since the War of 1812. The oldest, but in many ways the youngest manufacturing arsenal, we are capable of producing a wide variety of products and components using up-to-the-minute skills, equipment and technology.

What We Do

- Partner with Benet Laboratories in the research, development and manufacture
 - of products at a single site.
- Combine expertise with technology to produce the finest quality artillery weapons
 - in the world.
- Utilize computer aided design and manufacturing, plant-wide local area
 - networking, distributed numerical control, computer aided process planning and
 - shop floor control to produce an infinite range of products.
- Supplement manufacturing expertise with fabrication, welding, specialized
 - machining, composite filament winding and braiding, forging, heat treatment,
 - electroplating/surface coating, painting and packaging, and precision tool and
 - die making.
- Maintain highest quality throughout the manufacturing process through statistical
 - process control in a CP2 and ISO-certified manufacturing facility.
