

U.S. Army TACOM Life Cycle Management Command

Army Contracting Command – Warren (ACC – Warren)

Who We Are

The Army Contracting Command – Warren is part of the Army Contracting Command (ACC), and is located in Warren, MI at the TACOM Life Cycle Management Command (LCMC). With multiple geographic sites throughout the United States, we are responsible for acquisition support and contracting for a large number of the Army's major weapon systems, for systems and equipment supporting other services, for depot-level maintenance services, and for foreign military sales customers. We are a customer focused organization with goals related to customer satisfaction, contracting excellence, workforce and leadership development, and improving business processes. We share a common focus on soldier and ground systems throughout the entire life cycle with TACOM LCMC. If a Soldier shoots it, drives it, flies it, wears it, or eats it, ACC buys it.

What We Do

- We provide comprehensive acquisition, contracting, business advisory, production support, and acquiring, fielding, and sustaining TACOM LCMC systems and supporting requirements. We ensure that the best products and services reach our Soldiers when they need it, while ensuring fair opportunity for industry, including small businesses and obtaining the best value for our Army.
